

PRODUCT FOCUS: MULTI TASKER 1600

THE LOCATION

The People's Republic of China (PRC) controls about 110,000 km of rail network and is constantly working on its modernization. The number of passengers is growing. The supply of adequate rail equipment is an essential part of PRC's policy. Safety plays the most important role.

THE TASK

The demands on our railway cranes in China are as various as it is its landscapes and climate zones, its enormous passenger numbers and the dimension of its railway network. Our railway cranes meet all these requirements and offer particularly high lifting capacities.

THE CRANE

Kirow has already delivered sixteen Multi Tasker 1600 to the PRC. Since their delivery, our products are in use in many areas of the country and are esteemed as safe and reliable auxiliary devices especially for recovery work. The customer placed its trust in us again by ordering another 15, even more powerful, and 20 similar railway rescue cranes.

WHAT THE DESIGNER SAYS

"The Multi Tasker 1600 is a top model of Kirow. Compared with the type 1200, this device has significantly higher lifting capacities – in particular when working with props. Thus, this crane is predestined for the recovery of locomotives. Moreover, it is as multifunctional as the type 1200."
