

PRODUCT FOCUS: SLAG TAURUS P 90

THE CUSTOMER

Arcelor Mittal is one of the biggest steel manufacturing corporations worldwide. The headquarters of the company are located in Luxembourg and run over 60 steel mills all over the world. In 2011, Arcelor Mittal produced 97.2 million tons of raw iron.

THE TASK

The slag industry plays a substantial role in the system of steel production. The big challenge is to transport the slag safely, fast and efficiently. The slag pot carriers were especially developed for the tough working conditions at the steel mills.

THE TRANSPORTER

In 2012, Kirow supplied one Slag Taurus P 90 to the steel mill Arcelor Mittal Hamburg, where another Slag Taurus P 90 is already operating. With payloads of 90 tons the slag pot carriers are able to handle large quantities of slag fast and safely. With the articulated steering the Slag Taurus P 90 is easily and flexibly maneuverable in tight spaces despite its size.

WHAT THE DESIGNER SAYS

'The Slag Taurus P is an extremely robust and reliable slag pot carrier with articulated steering and patented safety system. In this high-tech product we exclusively install premium components from renowned manufacturers. With a payload from 40 to 140 tons the Slag Taurus P is the perfect working equipment for the slag industry for every steel mill size. Individual solutions can be created for any requirement.'

TECHNICAL DATA

OVERALL LENGTH	12,300 MM
OVERALL WIDTH	4,900 MM
OVERALL HEIGHT	4,800 MM
MAXIMUM PAYLOAD	90,000 KG
