

PRODUCT FOCUS: MULTI TASKER 100

THE CLIENT

The Swiss Federal Railways is the national railway company of Switzerland that have the most powerful transport service rate per inhabitant and the shortest intervals between trains worldwide. The railway network extends to 3,183 km and is subject to strict rules concerning punctuality. Only within a time-slot of three minutes, a train is considered to be on time.

THE TASK

The railway network requires the constant care and guaranteed safety as constant processes that are based on reliability, promptness and flexibility. The principal priority is to ensure the continuance of the rail traffic. For about 967,000 passengers every day, arriving on schedule is the most important criterion. Therefore, the lowest degree of interruption of the traffic is necessary.

THE CRANE

Twelve Multi Tasker 100 have already been delivered to the Swiss Federal Railways. As smallest type within the Multi Tasker series, the Multi Tasker 100 especially convinces with its compact design. Its fixed counterweight and the small rear radius permit the crane to work profile-free; the rail traffic has not to be interrupted. Thanks to the high working speed of the Multi Tasker 100, the cut-off time is as short as possible.

WHAT THE DESIGNER SAYS

'The Multi Tasker 100 is ideal for easy erection activities such as the setting of masts, sound insulation elements, etc. Lifting accessories for special tasks can also be supplied.'
